Future Employer

IT Department

September 23<sup>rd</sup>, 2023

Dear Employer,

I am a recently certified full stack developer with Comptia A+ certification making a path into the IT/Cybersecurity field. I am working to land my first paying job in the field. I hope to, in the future, establish a lucrative career in IT after gaining experience and mastering the skills necessary to become efficient in IT and Cybersecurity. Prior to learning web development, I had worked as an apprentice in an electrician union. My first job was at UCSD working on the Theatre District Learning and Living Neighborhood site. While there I learned many things useful in a tech field such as:

- An adequate understanding of how to wire data cables.
- A good sense of working diligently and efficiently in a relaxed environment where foremen aren't around to monitor your work.

My time as a health science major helped me to better understand my limits both physically and mentally and how to better apply any lessons I learned. As a health science major, many of the lessons learned were also expected to be demonstrated on a living human being, meaning I had to learn a way to apply my knowledge in a real world scenario that was outside of the book examples. A good instance of this was learning of the issues surrounding pronation and the effect this has on athletes compared to supinators.

My current job involves interning at a computer repair shop in San Diego. I help out in building PCs and repairing hardware and software issues of any computer or laptop that comes in. I have worked with various softwares and applications such as Memtest and

furmark to troubleshoot. I have built many PCs for clients and have swapped data from HDDs to SSDs for many clients with no issues. I work with Macs and Windows often and occasionally with Linux. I appreciate the opportunity to show you what I have learned in my time in college and my previous profession and how it can help to make me an effective worker in your company.

If you believe that I would be a good fit to your company, I have left my information to make it easier to contact me. I am looking forward to hearing from you.

**Thank you for offering your time and this opportunity of a lifetime.**

**Sincerely,**

**Matthew Sartor**
